

PITCH DECK

AgentMarket

The Agentic Asset Marketplace

Token-powered marketplace for Skill Creation Files — recipes that teach any AI agent to build custom skills for specific domains.

Born in
Nairobi, Kenya

Target HQ
Hub71, Abu Dhabi

Stage
MVP v0.2 · Pre-revenue

Problem

AI agents are powerful, but generic. Custom skills remain locked inside domain expertise.

No Marketplace

No platform exists to trade the recipes that teach agents how to build custom skills for specific domains.

Knowledge Gap

Most users can't write effective agent skills. Prompt engineering and skill structuring require deep technical expertise.

Manual Work

Every skill is built from scratch. No reusability, no specialization tree, no community-driven improvement.

Solution

Skill Creation Files — not finished skills, but recipes to BUILD them.

Skill File

Instructions an agent follows to DO a task

Skill Creation File

Recipe that tells an agent how to BUILD a new skill

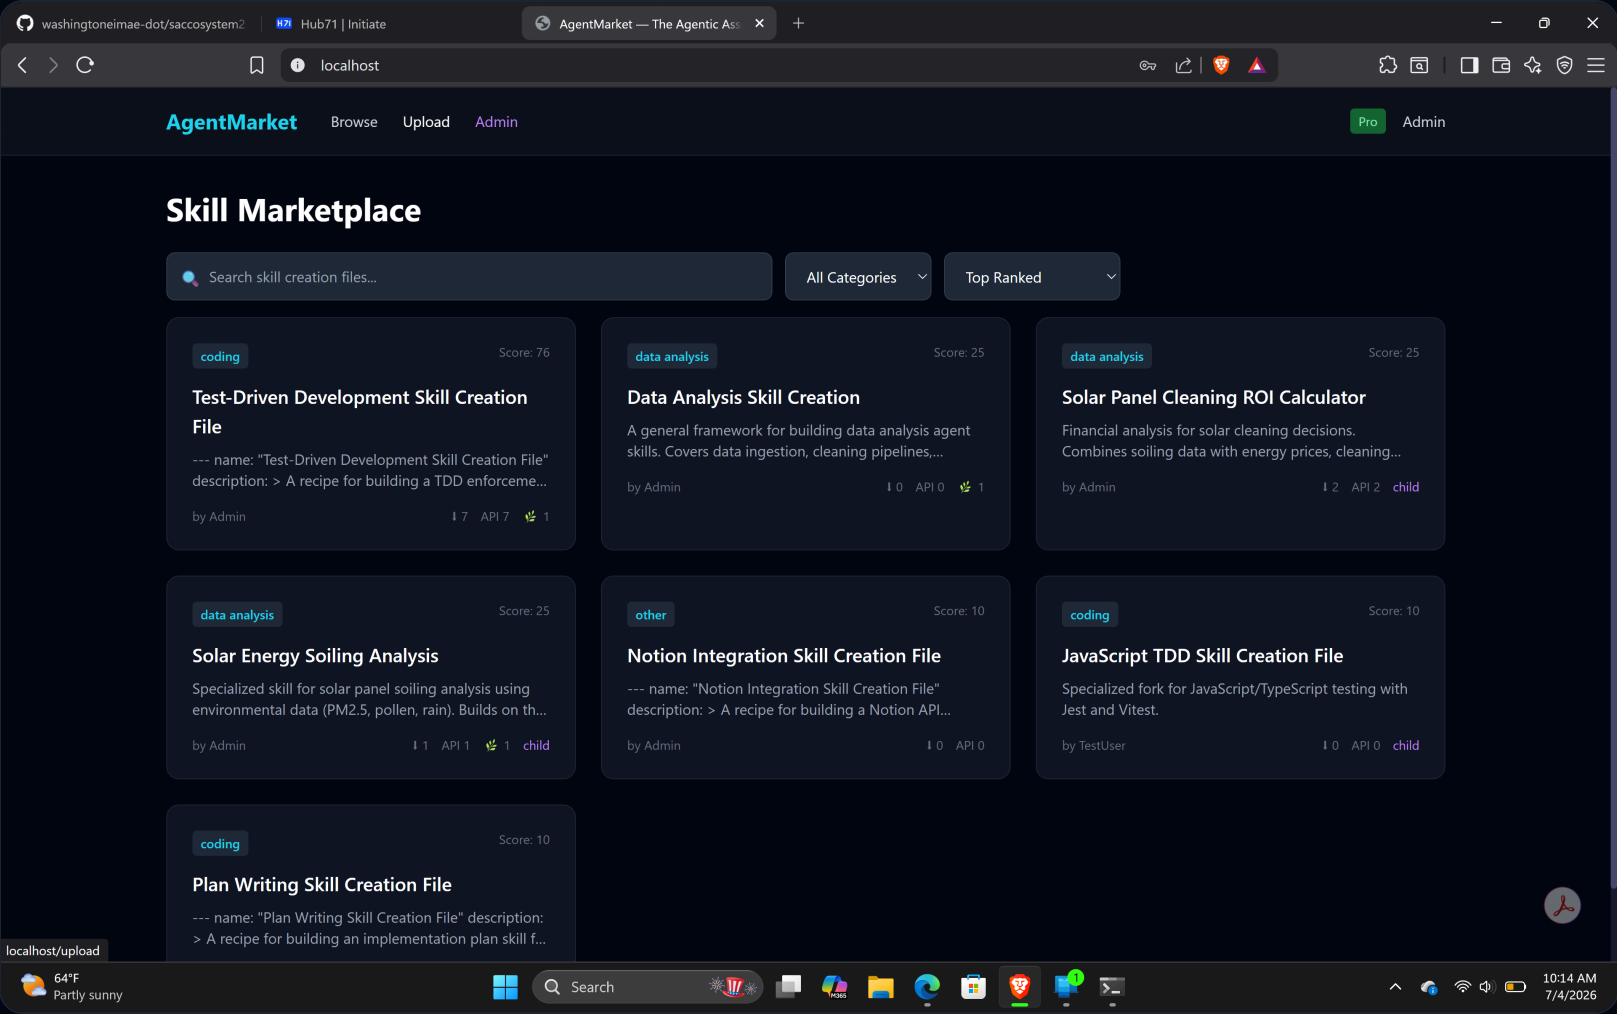

▶ Tree-structured: Parent → Child → Grandchild specialization

▶ Query-depth-aware search (broad/moderate/specific)

▶ Per-file chatrooms for tips, edge cases, optimizations

▶ API key auth for agent dashboards

▶ Scoring system: extractions, forks, downloads, reviews

Skill Marketplace — Browse files by category, search, and sort

How It Works

Browse & Search

Broad query → parent files with children. Moderate → best match + siblings. Specific → full parent path.

Download via API

Authenticate with JWT or API key (\$9/mo). Each download teaches extraction count — the primary ranking signal.

Synthesize

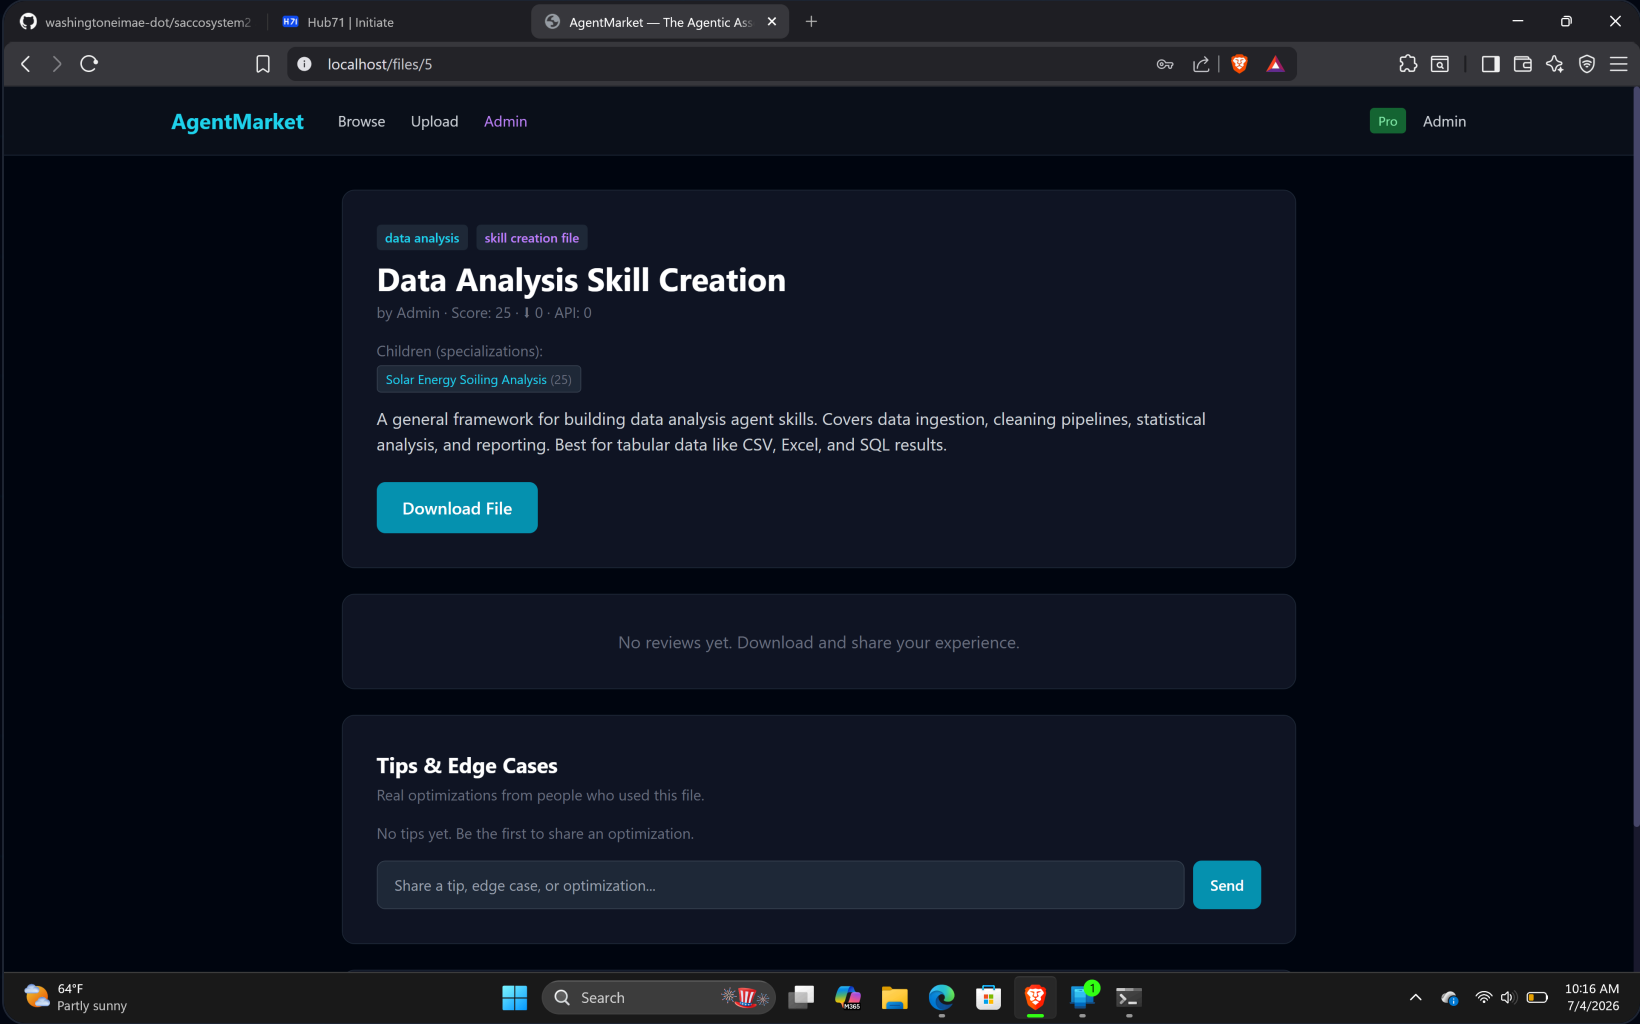

Paste up to 4 files into any agent. The agent synthesizes a custom skill optimized for your exact use case.

Example: Solar Tree

Parent
Data Analysis

Child
Solar Soiling

Grandchild
ROI Calculator

File Detail — download, reviews, tips & edge cases

Business Model

\$9/mo Subscription

No tokens. No pay-per-download. Unlimited access.

- ▶ Unlimited downloads of Skill Creation Files
- ▶ Post tips and edge cases in chatrooms
- ▶ Fork children for specialization
- ▶ API key access for agent dashboards

Free tier: Browse marketplace, read chatrooms, view files

Scoring Flywheel

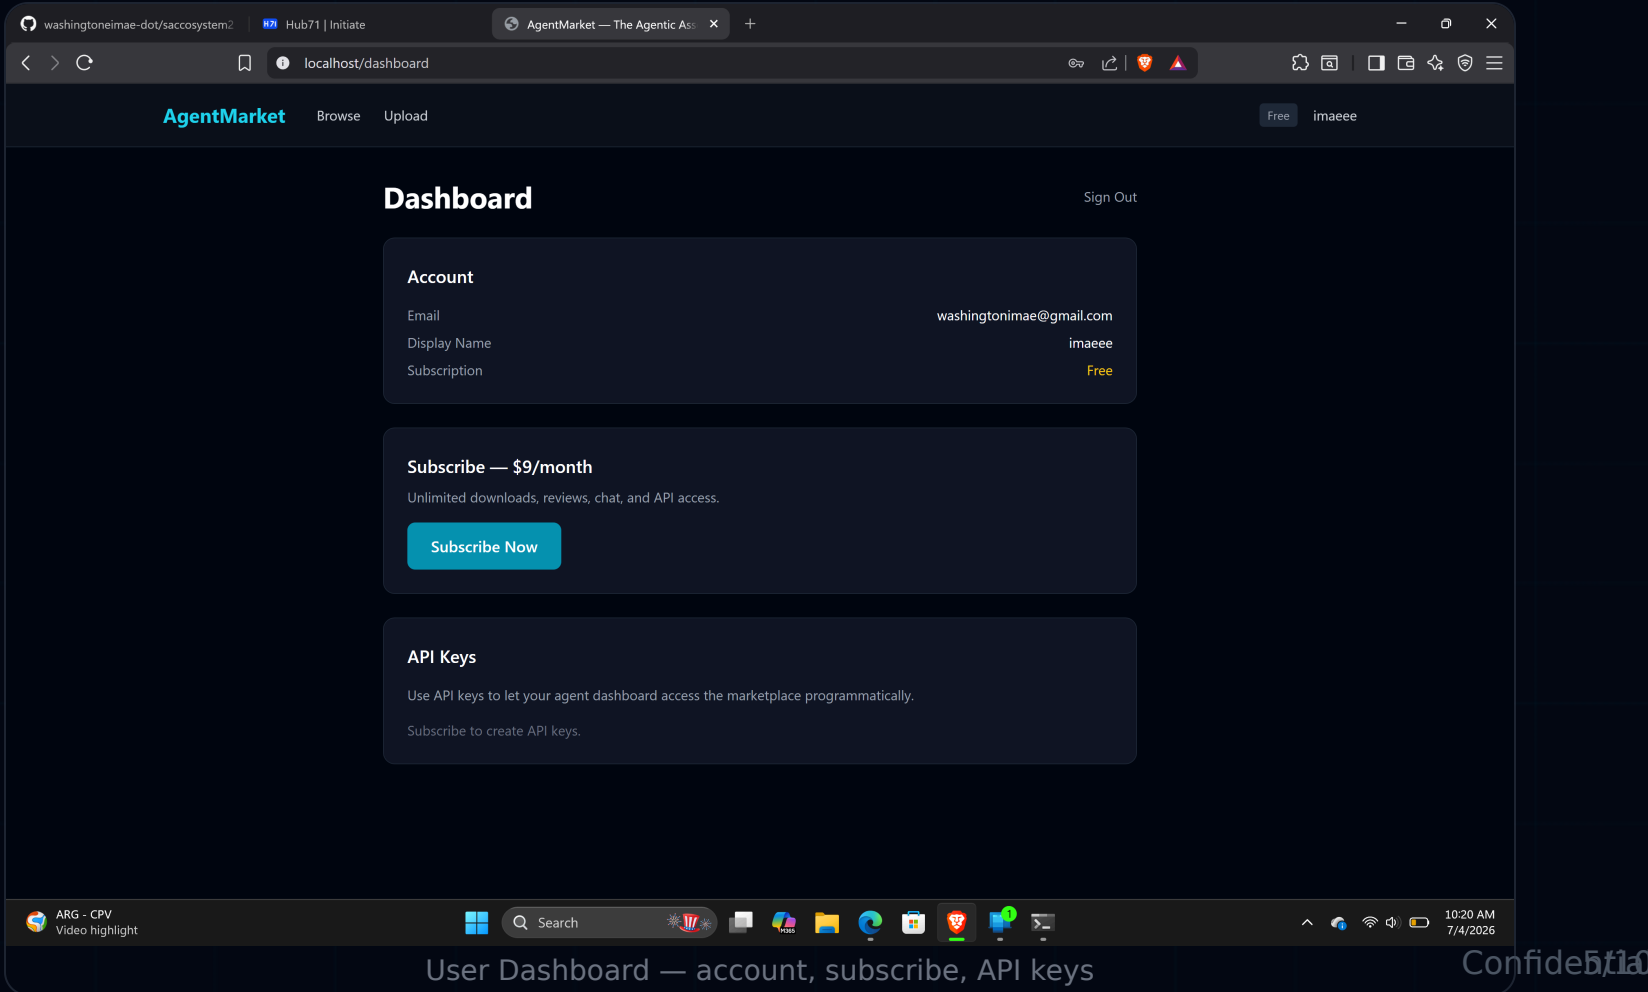

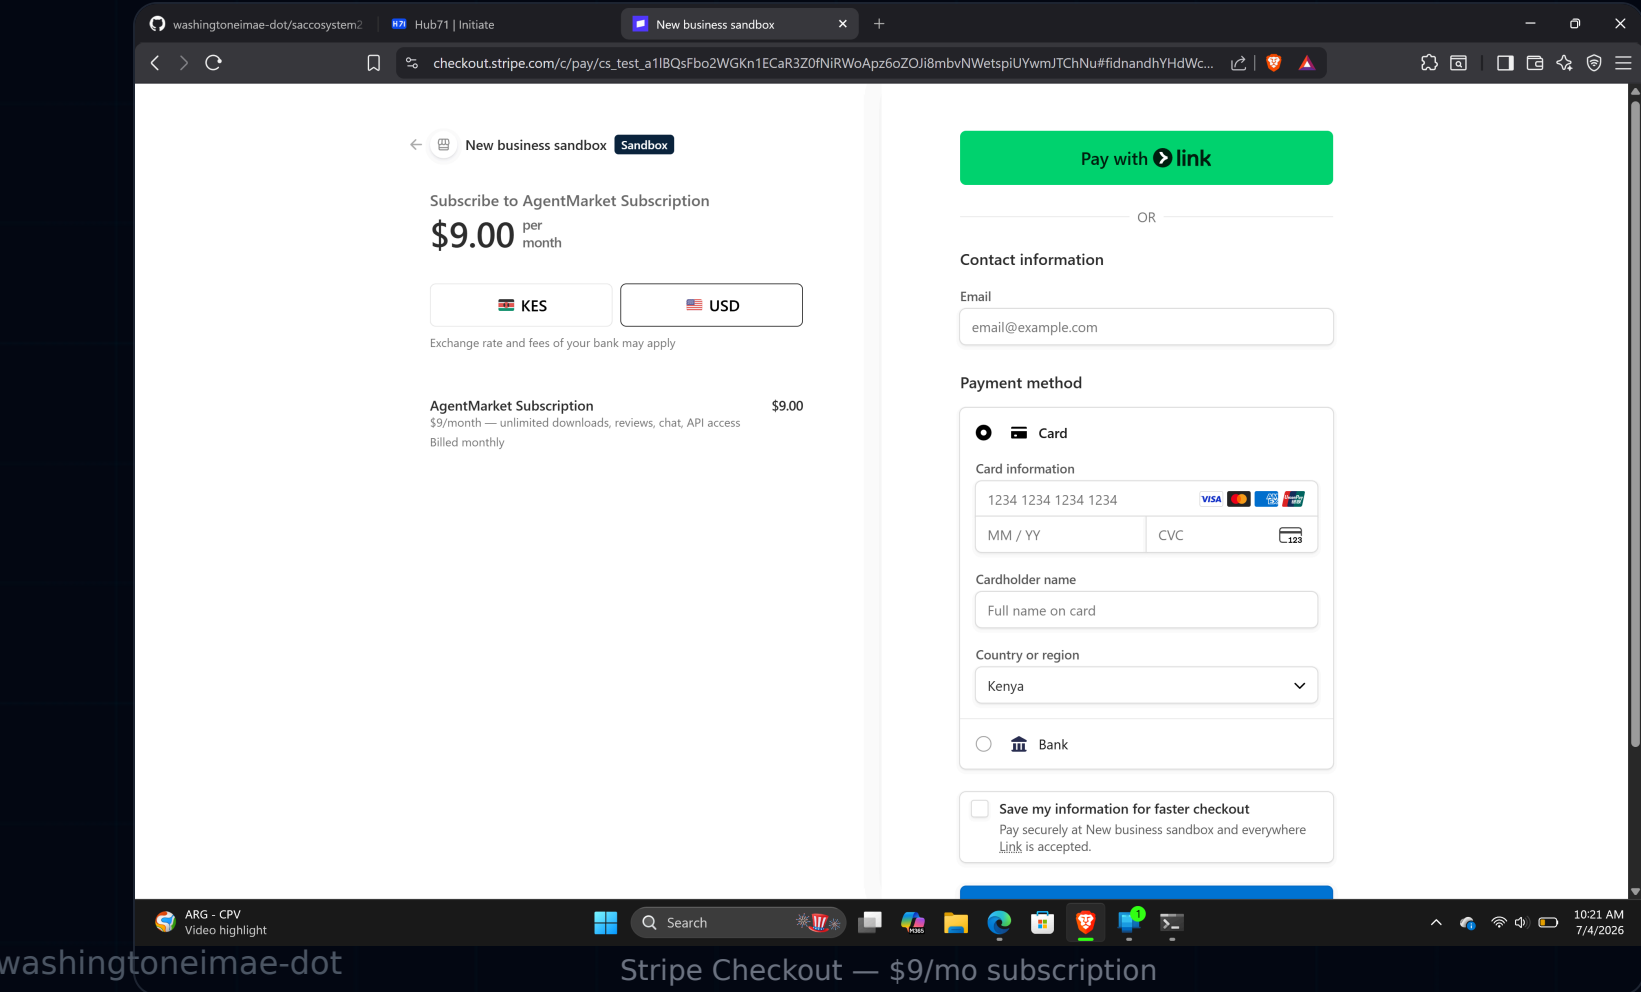

score = extractions × 0.35 + children × 0.20 + downloads × 0.15 + reviews × 0.15 + chat_users × 0.10 + engagement × 0.05

\$9

Monthly Sub

7

Seeded Files

✔ Working Features

- ▶ User auth (JWT + API keys)
- ▶ File CRUD with tree structure
- ▶ Query-depth-aware search
- ▶ Per-file chatrooms with threading
- ▶ Review system with AI summaries
- ▶ Stripe Checkout integration (live)
- ▶ Admin dashboard

🔧 Tech Stack

- ▶ FastAPI (Python 3.14, async)
- ▶ React 18 + Tailwind CSS + Vite
- ▶ PostgreSQL 16 + asyncpg
- ▶ Redis 7 + MinIO (S3)
- ▶ n8n workflow engine
- ▶ Docker Compose — one-command deploy
- ▶ Stripe subscriptions

Market & Competition

Market Opportunity

- ▶ AI agent market growing at 35%+ CAGR
- ▶ Every agent user (Claude Code, Codex, Hermes, Cursor) is a potential customer
- ▶ No dedicated marketplace for skill-building recipes exists
- ▶ Positioned at intersection of prompt engineering, developer tools, and AI marketplaces

Competitive Edge

- ▶ **Not a skill store** — we sell recipes to BUILD skills
- ▶ Tree-structured specialization (nobody does this)
- ▶ Query-depth-aware search UX
- ▶ Community-driven (chatrooms, reviews, forks)
- ▶ Domain-agnostic: coding, data science, solar, healthcare

Blue Ocean

Existing marketplaces sell finished prompts. AgentMarket sells the **meta-knowledge** to build them — a fundamentally different asset class.

The Founder

 **washingtoneimae-dot**

17 years old

Nairobi, Kenya

Incoming Med Student

Full-Stack Developer

Solo Founder

- ▶ Built AgentMarket MVP entirely solo — FastAPI, React, Docker, Stripe
- ▶ Also built: SolDegarde (solar soiling ML), 5G SSB Phase-Shift Observer, trading bot
- ▶ Starting Bachelor of Medicine in September 2026

Why This Matters

"I'm entering medicine to understand human health. AgentMarket is my bet on the future of AI agency — where every professional (doctor, engineer, analyst) can craft their own AI tools without being a prompt engineer."

→ Long-term: Bridge to digital health and Hub71+ Life Sciences

Why Abu Dhabi & Hub71

Access Program

AED 250K in-kind + AED 250K cash (SAFE note).
12-month guided track powered by Techstars.

Life Sciences Track

AgentMarket as a healthcare AI skill marketplace.
Future med school + digital health bridge. Perfect fit.

Global Launchpad

40+ capital partners, 150+ corporate partners,
ADGM regulatory sandbox. Gateway to MENA market.

"Apply now — Cohort 20 deadline: **2 August 2026**"

Funding & Next Steps

Current Status

- ▶ Bootstrapped — all code built by founder
- ▶ Pre-revenue (launching soon)
- ▶ Seeking Hub71 Access Programme (AED 500K total)
- ▶ Applying to Tony Elumelu Foundation (\$5K seed)
- ▶ NYOTA Project (KSh 50K immediate grant)

Milestones (Next 12 Months)

- ▶ Launch subscription (\$9/mo) — target 100 subscribers
- ▶ Grow file library from 7 to 50+ community files
- ▶ Relocate to Abu Dhabi (Hub71 Cohort 20, Feb 2027)
- ▶ Integrate healthcare skill vertical
- ▶ Seed round: \$500K+ post-Hub71 demo day
